Paul, appreciate the quick response. Once you have been able to confirm with Auxier where air sampling stands (per sampling cycle and each method deployed), please be sure to let us know how/if this early pull of data and subsequent analysis will effect (if at all) the results. We want to be sure and make an informed decision on the relevant information and be certain it does not bias or have cause for misinterpretation of data. I've also tagged Tom on this email as the responding OSC for his awareness. Thanks,

Bradley Vann - Remedial Project Manager

Lynn,

Attached is the Bridgeton Landfill Incident Management Plan. I have also attached the Bridgeton Landfill Incident Report.

Sorry it took me so long to get back to you but I was travelling to St. Louis when you sent your request and once I got here have been on the phone continuously.

Let me know if there is anything else you need.

Hello Paul, as soon as you are able, would you have someone on your staff send me the current version of the West Lake Landfill Contingency Plan and/or Emergency Response Plan. As you know, we will be discussing with the PRPs what, if any, updates need to be made to those plans based on yesterday's event at the Bridgeton Landfill.

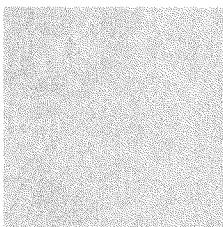

Thank you,
Lynn Juett

Lynn,

Thank you for your note and the associated clarification. Joe did let me know about adding you to all document distributions and I have been doing this since that point. It helps to understand how you and Brad will be dividing up the work. We look forward to working with you.

Subject: West Lake Landfill Contacts

Good morning Paul –

Mary Peterson, the Superfund Division Director, has asked me to let you know that I am the technical lead on the EPA's request for additional work and AOC modification. Brad will remain your contact for the Area 1 / Area 2 Additional Characterization field work and for matters related to groundwater. I spoke to Joe about this a couple of weeks ago and our office is working on a formal notification letter to the PRPs to clarify our roles. If you have any questions, please don't hesitate to call me.

Thank you,

Lynn M. Juett
